## BRC

### Accessories Wireless Remote Controller

Take full control of your audio system with the BRC Wireless Remote Controller, the compact Audison accessory designed to deliver immediate and intuitive operation of any Bluetooth streaming device. Acting as a Bluetooth remote control, the BRC works with any compatible source used for music streaming, including smartphones, DAPs (Digital Audio Players), and other Bluetooth-enabled devices, providing a convenient alternative to touchscreen control while driving. When used in systems featuring Audison B-CON or B-CON II, the BRC leverages the Absolute Volume function to enable precise and synchronized volume adjustment directly from the controller, without any loss of audio quality, preserving the integrity of the listening experience. With its clean design, wireless functionality, and tactile controls for volume, play, pause, and track navigation, the BRC enhances both usability and safety, offering a seamless and distraction-free way to manage your music inside the vehicle.
