2018*-Up Jeep® **WRANGLER UNLIMITED (JL)** 4-Door models only

This Stealthbox® subwoofer system combines our advanced thin-line subwoofer technology with a form fitting sealed enclosure design. It delivers outstanding sub-bass performance in your 4-door JL Wrangler, without consuming any useful cargo space.

Available in separate driver and passenger side models, with 2 or 4 ohm drivers, each Stealthbox® houses a 10TW1 thin-line subwoofer and mounts solidly above each rear wheel well. A matching trim panel and sturdy steel-mesh grille are also included, so you can carry plenty of gear without worrying about damage.

The Hard Data:

If vehicle is factory-equipped with Premium Audio, passenger side Stealthbox® installation requires removal of OEM subwoofer and purchase of interior trim parts from Jeep®.

Soft-top models: Stealthbox® installation does not interfere with normal top operation, except for the final position where the top mechanism is detached from the rails.

***Will not fit any "JK" models or 2-Door "JL" models.**

Separate driver and passenger side
Stealthbox® models are available
**Hit the trails with one, or two,
without losing cargo space!**

STEALTHBOX® ACCESSORIES

These Stealthbox® Accessories are specifically engineered for your JL Wrangler, and purpose-built to maximize functionality and installation integrity.

SBA-J-JLU-UAR

2018-Up Jeep® Wrangler (JL) Unlimited and 2020-Up Jeep® Gladiator (JT) Universal Amplifier Rack

The SBA-J-JLU-UAR Amplifier Rack fits under either front seat to securely mount one of several different JL Audio amplifier models (sold separately). Featuring an angled design to maximize rear passenger foot space, the SBA-J-JLU-UAR Amplifier Rack installs using factory hardware (no drilling required). Powder-coated steel, engineered and built in USA.

Pictured below with VX800/8i and VX1000/1i amplifiers installed under each front seat.

SBA-J-JL-FHB

2018*-Up Jeep® Wrangler (JL) and 2020-Up Jeep® Gladiator (JT) Fuse Holder Bracket

The SBA-J-JL-FHB Fuse Holder Bracket easily and securely mounts up to two JL Audio XB-MFBU-ANL Master Fuse Blocks (sold separately). Attaches to the vehicle's firewall using factory hardware (no drilling required). Powder-coated steel, engineered and built in USA.

*Will not fit vehicles equipped with the EcoDiesel engine or any "JK" models.

SB-J-JK2DR/10w1v3

2007-2018 Jeep® Wrangler (JK) 2-Door

Low-profile design sits inconspicuously on the cargo-area floor and features a rigid, carpet-covered, removable panel that conceals a powerful 10-inch subwoofer driver and a secure mounting place for a JL Audio amplifier (sold separately). The subwoofer driver is housed in a sealed, carpet-covered fiberglass enclosure. The entire structure is designed to be easily installed and removed when the tailgate is opened, so you can quickly remove it if you plan to get your Jeep really filthy or need the extra space.

The Hard Data:

Contains one 10W1v3-2 subwoofer in a sealed enclosure. 300 watt power handling, 2 ohm impedance. Installs on floor of the rear cargo area. Floor of cargo area is raised approximately 5-inches with installation. Will not affect rear seat-folding functionality. Cannot be used without the factory tailgate in place.

Cut-away view

SB-J-UNLTD4D/13TW5v2

2007-2012 Jeep® Wrangler Unlimited (JK) 4-Door

Add powerful, audiophile bass quality without significantly compromising your precious cargo space. Our patented, low-profile TW5v2 subwoofer technology makes it possible to extract amazing bass from a very thin enclosure that bolts solidly to the passenger-side rear wheel well. Rugged, 100% fiberglass construction is as tough as your Jeep® and the protected driver position means that you can still toss all your gear in the back without worrying about damage. It also won't call attention to itself in parking lots... even if you have a ragtop.

The Hard Data:

Contains one 13TW5v2-2 subwoofer in a sealed enclosure. 600 Watt power handling, 2 ohm impedance. Installs against passenger-side wheel well. Requires removal of factory subwoofer, if so equipped.

For '11-'12 models with a 12V accessory plug on the rear passenger side cargo panel/subwoofer, you must purchase a plain (without subwoofer) passenger side rear cargo trim panel and an upper seat belt/roll bar cover from Jeep/Mopar parts. Use of the accessory outlet is lost with Stealthbox® installation.

SB-J-WRUD/10TW1

2007-2018* Jeep® Wrangler Unlimited (JK) 4-Door

Custom-formed fiberglass enclosures combine with our advanced thin-line subwoofers to produce amazing sub-bass performance in your 4-door Wrangler, without consuming excess cargo space.

Available in separate driver and passenger side models, each Stealthbox® houses a 10TW1 thin-line subwoofer driver and mounts solidly above each rear wheel well. Outfit your JK with one for incredible bass, or install two for maximum performance.

The Hard Data:

Each system contains one 10TW1-4 in a sealed enclosure with 300 watt power handling. Each enclosure is 4 ohms impedance (using two achieves a 2 ohm load in parallel). A steel mesh grille is included with each to protect the subwoofer driver. Does not affect hard top installation.

*Will only fit 2018 "JK" models. Will not fit 2018 "JL" models.

Driver and passenger models available (sold separately)

How we play.®

2020-Up Jeep® GLADIATOR (JT)

SB-J-JTGLAD/10TW1

More than just a Jeep pickup, the Gladiator is an accomplished off-road vehicle with dramatic styling and advanced technology features. Our Stealthbox® enhances all this by adding impressive, high-quality bass without losing any of your precious people space or interior functionality.

Featuring an all-fiberglass, sealed enclosure design, this Stealthbox® houses two of our innovative 10TW1 thin-line subwoofers and mounts neatly under the rear seat, without compromising rear passenger comfort. Rear seat folding is unaffected, and we even left space on the enclosure that's perfect for a clean, hidden amplifier installation!

The Hard Data:

Contains two 10TW1-4 subwoofer drivers in a sealed enclosure. 600 watt power handling. Wired for 2 ohm mono. **Installation requires removal of under seat storage compartment, if equipped. Retains hardtop hardware storage box and jack stowage.**

Cut-away view

"If you're lucky enough to have a vehicle that one of these Stealthboxes is made for, choosing it over anything else we have seen or heard is a no brainer."
